Prevalence of ME/CFS in Europe: results from Belgrade to Sofia meeting?

Jesus Castro, PhD
Vall d'Hebron University Hospital
Barcelona, Spain

What has been done so far?

- ◆ **Online EURO-EpiME survey study**

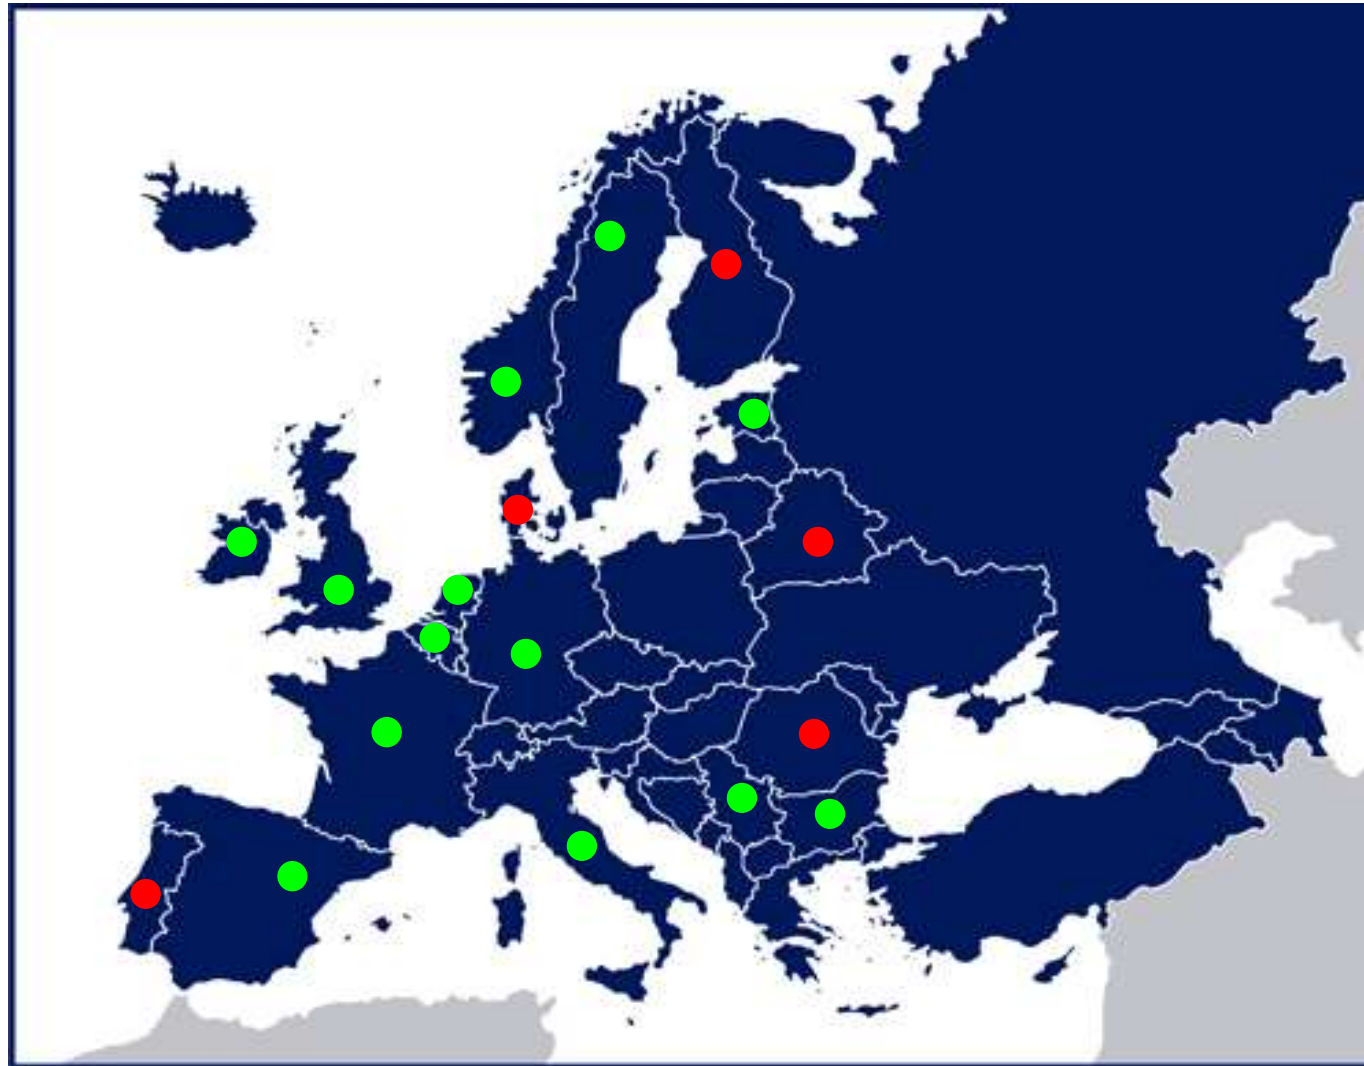

New alternative ways about how to collect epidemiological metadata from Europe countries

- ◆ **Systematic literature review on the prevalence of ME/CFS across Europe**

An epidemiological approach is addressed through EUROMENE ME/CFS Epidemiology Working Group

Updated current situation regarding to EURO-EpiME survey data

● Data retrieved

Bulgaria
Belgium
France
Germany
Italy
Norway
Spain
Serbia
Sweden
UK
Ireland
The Netherlands
Latvia

● Data no-retrieved

Belarus Romania
Finland Portugal
Denmark

Horizon 2020

Steps followed: Systematic search

- **Databases & Keywords combination**
 - **Scopus**: ({epidemiology} OR {prevalence} OR {incidence}) AND ({chronic fatigue syndrome} OR {myalgic encephalomyelitis} OR {CFS/ME} OR {ME/CFS})
 - **Web of Science**: (“epidemiology” OR “prevalence” OR “incidence”) AND (“chronic fatigue syndrome” OR “myalgic encephalomyelitis” OR “CFS/ME” OR “ME/CFS”)

Steps followed: Systematic search

- **Databases & Keywords combination**
 - **Pubmed**: ("Fatigue Syndrome, Chronic"[Mesh] AND (("Incidence"[Mesh] OR "Epidemiology"[Mesh] OR "epidemiology"[Subheading]) OR "Prevalence"[Mesh] OR "Cross-Sectional Studies"[Mesh]))

Steps followed: Extended search

- References of included papers
- Citations of included papers
- Online EUROMENE survey by e-mail (EURO-EpiME study)

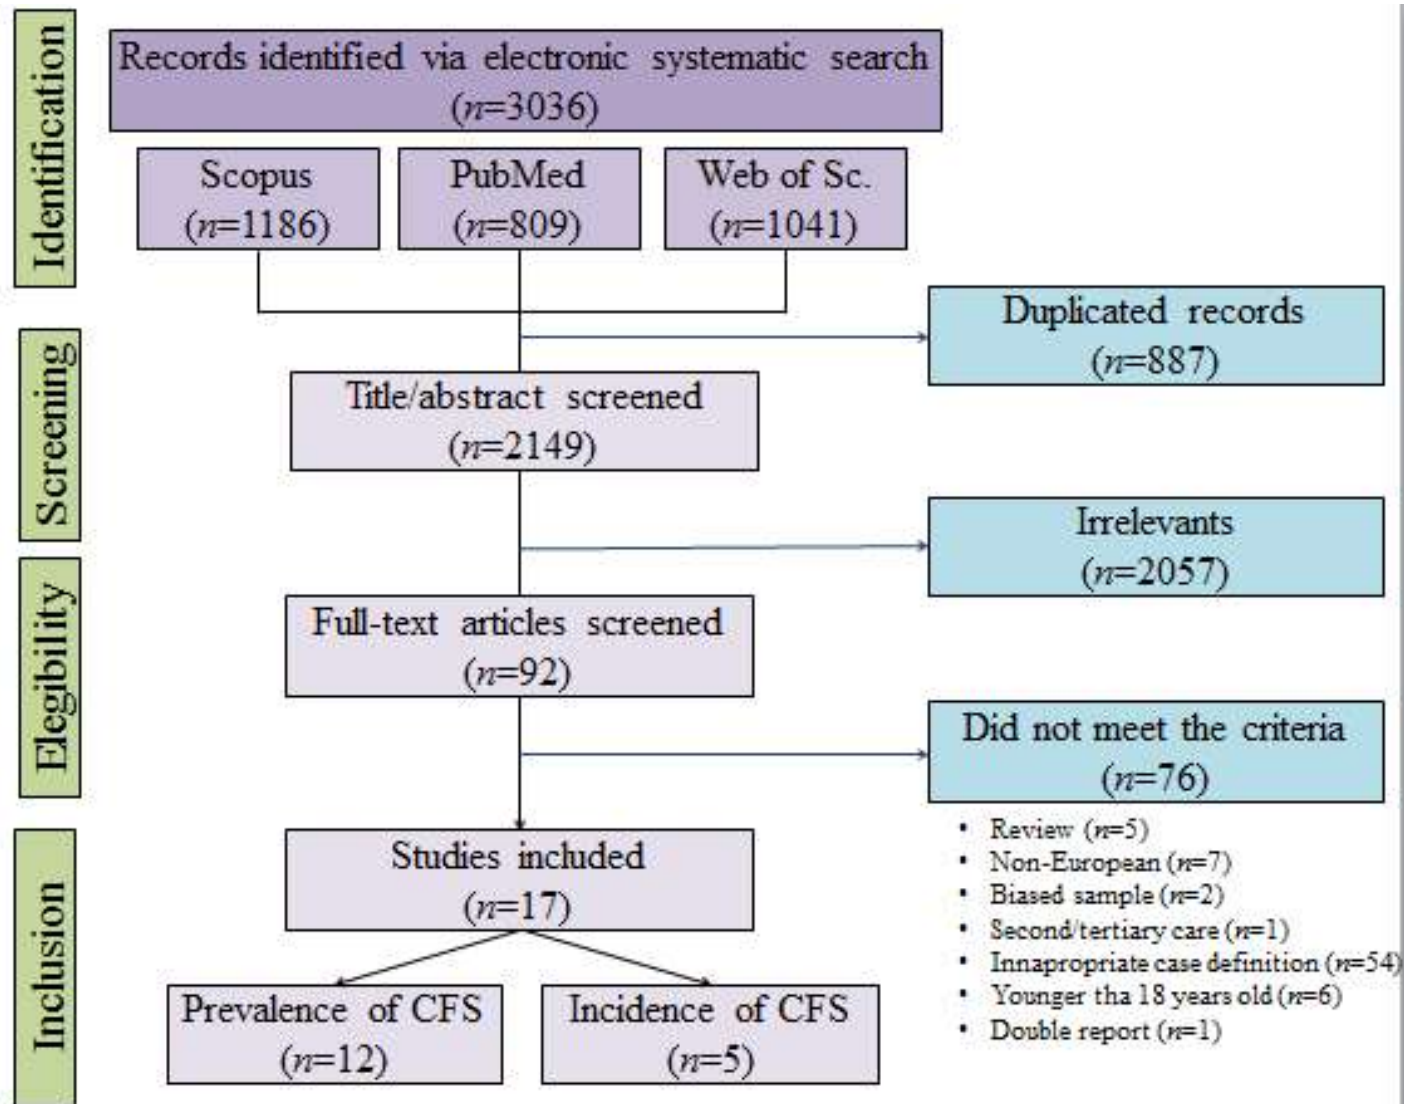

Steps followed: Exclusion criteria

- Review
- Non-European studies
- Biased samples (e.g., **vaccines, virus infection**)
- Secondary or tertiary care (i.e., high-risk groups)
- Innappropriate case definition (e.g., **Oxford criteria, CFS/ME-like illnesses**)
- Children and adolescents
- Double reports

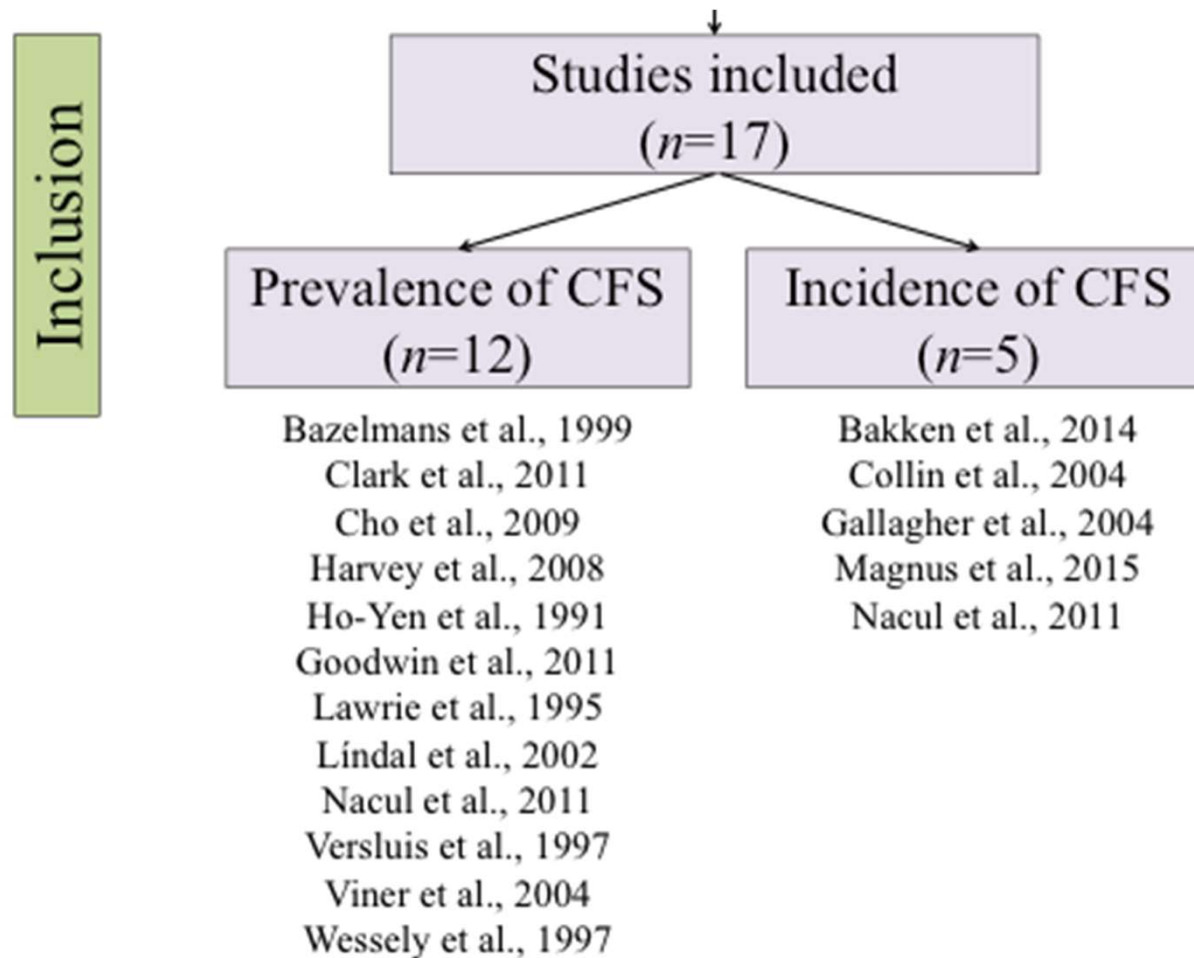

Steps followed: Quality assessment

- **Tool:**
 - Joanna Briggs Institute-Checklist for Prevalence Studies
- **Main advantage:**
 - Short & easy to apply
- **Main disadvantage:**
 - Not widely used

What's the future: do we want to improve the systematic review?

- If yes,
 - Prospero registration (Ref. CRD4201-7078688)
 - Double check (e.g., review & data extraction)
 - Ask authors for further details (e.g., prevalence by gender, age ranges)
 - Better quality assessment
 - Meta-analyses: Global and specific ones
 - **Other suggestions?**

IJE article achieves entry in the Altmetrics Top 100 of 2017

Each year, the journal articles that have received the most attention online are highlighted in the Altmetrics Top 100 list to showcase the online engagement of the research. This year, *IJE* article, [Fruit and vegetable intake and the risk of cardiovascular disease, total cancer and all-cause mortality-a systematic review and dose-response meta-analysis of prospective studies](#), achieved a spot in the Top 100. The article details the many benefits of fruit and vegetables for human health.
